

Preliminary Bibliography

The following sources in European languages are among those consulted in the course of preparing the first edition of the Linguasphere Register, and include all those cited in the chapters above (where citations are abbreviated to principal name(s) plus date, e.g. Bec 1986). The bibliography includes also a list of relevant linguistic publications by the compiler of the *Register*.

To the right of each title is an indication of the linguasphere sector or sectors to which that work applies (with the indication "linguasphere" for works of general application, or which deal with languages in more than five sectors).

The present bibliography should be regarded as preliminary, since the documentation of all entries in the Linguasphere Register will require a classified bibliography of many times this length.
